

Docker Business: An Investment in Long-Term Excellence

Supercharge development. Deliver solutions faster.

Docker is not just a platform, it's your trusted partner on the path to application excellence.

Unlock the full potential of Docker Business and elevate your development lifecycle with an extensive arsenal of tools, features, and services. This subscription doesn't just enable container deployment; it empowers you with a tailor-made experience. Dive deeper into your devs' process, gain unprecedented visibility, and foster unparalleled collaboration with Docker Business.

Docker is Uniquely Focused on Developer Success

400x

Faster to first container pushed to production

13x

Increase in release frequency

99%

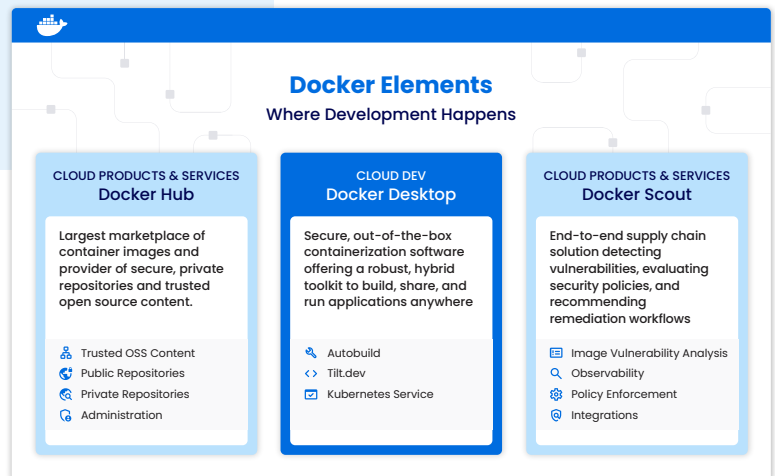

Faster from commit to deploy

7x

Decreased change failure rate

84x

Decreased MTTR

Empowered Dev Teams Run Faster Than Ever Before

Docker Business isn't merely an option, it is your strategic choice for fortifying security, streamlining management, and supercharging scalability as you propel your business forward, one confident step at a time.

Docker Business users enjoy distinctive additional benefits:

Improved organizational efficiency

- Easy onboarding with SSO & SCIM
- Centralized management for better control over dev environments
- Extended support lifecycle for Docker Desktop
- Expedited support response time
- Add-on IP allow listing
- VDI support
- Account hierarchy to easily manage information sharing across teams

Secure developer environments

- Confidently manage your org's usage of Docker Desktop with Settings Management*
- Prevent containers from running as root in Docker Desktop's Linux VM and ensure that configurations cannot be modified with the help of Enhanced Container Isolation*
- Content controls with Registry Access Management and Image Access Management
- GDPR/SOC2/ITAR certification
- Domain audit
- Unlimited private repositories

You can further enhance our Docker Business security capabilities by adding on **Docker Scout**! This supply chain solution analyzes images for known vulnerabilities, giving developers alerts and remediation suggestions so they can fix security issues well before they make it to production.

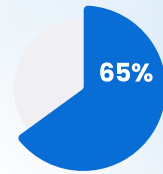

Accelerated business transformation

- Early access to products and features coming from our \$50M+ annual investment in R&D
- Exclusive brown bag sessions to help solve your unique business challenges
- Access to a robust online community of 15M+ registered developers from over 200+ countries
